SUMMARY

Software Engineering undergraduate with hands-on experience in React, Flutter, and backend development. Skilled in building scalable full-stack web and mobile applications with clean architecture. Completed a year-long internship at Syntax Erreur, contributing to production-ready projects across web, mobile, and backend systems. Seeking entry-level opportunities to apply my skills and continue growing as a developer.

LANGUAGES

Tamil | English | Sinhala

SKILLS

Languages: Java, Python, JavaScript, TypeScript, Kotlin, SQL, HTML, CSS

Frontend: React.js, Flutter, Redux, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, Prisma ORM, Flask, MongoDB, PostgreSQL, MySQL

DevOps & Tools: Docker, Git, GitHub, Postman, AWS (S3, Pinpoint), Firebase

CERTIFICATES

Informatics MERN Stack - University of Colombo School of Computing

Completed an 8-week (60-hour) training course on full-stack development using MongoDB, Express, React, and Node.js.

CS50x – Harvard University (via edX)

Completed CS50x, including ten problem sets and one final project, covering fundamental computer science and programming concepts.

EDUCATION

Informatics Institute Of Technology

BEng(Hons) in Software Engineering

Sep 2021 – Present | Colombo

D.S.Senanayake College

2012 – 2020 | Colombo

Nangalla MMV

2007 – 2012 | Colombo

EXPERIENCE

Intern Full-Stack Developer

Syntax Erreur

May 2024 – Jun 2025 | Remote

- Built responsive cross-platform apps with **Flutter** and **React**, improving usability and performance.
- Developed and optimized REST APIs using **Node.js**, **Express**, **Prisma**, with SQL/NoSQL databases and **JWT authentication**.
- Applied **Redux** and **Flutter BLoC** for state management, improving scalability and reducing navigation bugs.
- Containerized services with **Docker**, cutting environment setup time by 50%.
- Built admin panels with **Vite** + **shadcn/ui**, streamlining content management for clients.
- Integrated **Firebase Authentication**, **Cloud Messaging**, **Analytics** and **AWS S3 & Pinpoint** for secure file handling, notifications, and email verification.
- Contributed to major projects: **Recruitment Platform**, **Service Booking System**, **POS applications**, delivering production-ready solutions within deadlines.

PROJECTS

Cinema Theatre Ticket Booking App

- Developed a Flutter-based mobile application for cinema ticket booking. Integrated **Firebase Authentication** for secure login and **Cloud Firestore** for seat availability and booking management.

Invoice Management System

- A Full-stack invoice management system with authentication, real-time database (Firestore), and modern UI, built using React, TypeScript, and deployed on Vercel.

React E-Commerce Website

- Built a fully responsive e-commerce website using **React**, **Node.js**, **MongoDB** and **Express.js**.
- Integrated product listings, user authentication, and a shopping cart.

Console System for Skin Consultation Center

- Designed a Java-based consultation system implementing **OOP principles**.
- Developed a **Java Swing** and **JavaFX** GUI to enhance user experience.

Mobile Application to View and Save Food Recipes

- Developed an Android app using **Kotlin** to fetch and display recipes from a public API with search by ingredient or food name.
- Integrated a **local database** to allow users to save and access favorite recipes offline.

Dice Game for Mobile

- Developed an Android mobile game using **Java** with an adjustable target score.
- Enabled multiplayer mode and AI opponent with easy and hard difficulty levels.
